

THE VENTURE BLUEPRINT METHOD

WE DON'T START WITH IDEAS. WE START WITH A BLUEPRINT.

How a farm labor crisis became a 200 billion US dollar market size venture in 100 days—and what it means for the next builder.

[See How It Happened](#)

EVERYONE KNEW THERE WAS A LABOR PROBLEM. NOBODY KNEW WHAT IT ACTUALLY WAS

"Farm labor shortage" is a phrase you hear everywhere in Indian agriculture. It's in government reports. It's in newspaper headlines. It's repeated at conferences.

But what does it actually mean?

Does it mean not enough workers exist? Or that workers won't come to farms? Or that wages are too high? Or too low? Or that hiring is chaotic? Or that retention is impossible?

The answer: all of the above. And none of the above.

The real problem wasn't labor shortage. It was invisibility.

Does it mean not enough workers exist? Or that workers won't come to farms? Or that wages are too high? Or too low? Or that hiring is chaotic? Or that retention is impossible?

We needed ground truth. Not desk research.

60 PEOPLE. ONE ROOM. NO PRESENTATIONS. JUST TRUTH.

In May 2025, DISQ convened what we call a Farm Truths Dialogue an unconference designed to uncover reality, not validate assumptions.

Who Was In The Room.

50+ Horticulture Farmers
Grape growers, banana farmers, pomegranate operators.

FPO Leaders
Managing thousands of farmers

Farm Supervisors
Who hire labor daily

Labor Contractors
20+ years in the business

Agronomists
Understanding crop cycles

Understanding crop cycles
Supply Chain Operators
Downstream impact experts

What We Did NOT Do

- ✗ No keynote speeches
- ✗ No panel discussions
- ✗ No PowerPoints

What We Did

- ✓ Open dialogue
- ✓ Candid conversations
- ✓ Pattern recognition

जर हा मजुरांचा प्रश्न सुटला नाही, तर आम्हाला शेती सोडावी लागेल.

- रामदास पाटील, शेतकरी

This wasn't hyperbole. It was desperation.

THE CRISIS WASN'T WHAT WE THOUGHT IT WAS.

After careful reflection and consolidation of the Farm Truths conversations, the patterns became clear:

The problem wasn't 'labor shortage.' The problem was a broken co-ordination system.

WHAT FARMERS TOLD US

- "I need 50 workers tomorrow for harvesting. I have no idea if they'll show up."
- "Contractors promise one wage, workers demand another when they arrive."
- "My grapes are ready today. If workers don't come for 3 days, I lose 30% of my crop value."
- "Good workers from last season? I have no way to find them again."
- "Workers get no training, no insurance, no predictability. Why would they stay?"

WHAT WORKERS TOLD US

- "We don't know where work is available until the morning."
- "Wage negotiation happens on-site. It's always tense."
- "If we get injured, there's no safety net."
- "We want steady work, not day-to-day uncertainty."

This wasn't a supply-demand mismatch. This was a trust and coordination failure—invisible to policy, ignored by tech platforms, unsolved by traditional agriculture. ₹thousands lost per farmer per season. Tens of thousands of workers stuck in informal chaos. An entire system running on phone calls and word-of-mouth.

This was a category-defining opportunity hiding in plain sight.

WE DIDN'T JUST FIND A PROBLEM. WE BUILT THE SOLUTION BLUEPRINT BEFORE THE FOUNDERS ARRIVED.

Most accelerators say: "Bring us your idea, and we'll help you validate it." We flipped it.

We validated the opportunity first. Then we found the builders.

After extensive consultations and real user feedback from Farm Truths we had:

A COMPLETE VENTURE BLUEPRINT

- Vision: A labor intelligence platform that formalizes farm hiring
- Market sizing: Maharashtra grapes + bananas = substantial wage pool annually
- Unit economics: Take-rate per worker-day + tool rental + embedded finance
- Pilot blueprint: Nashik grape farms, 500 worker-days in first month
- Risk map: Seasonality, churn, regulatory constraints—and mitigations

PILOT-READY ACCESS

- Sahyadri Farms: 15,000 farmers, immediate testing ground
- 12 packhouses with daily labor needs
- Anchor customers identified before a single line of code

THE GUARANTEE

- Paid pilots from day 1 (actual revenue, not free trials)
- Farmer network access (35,000+ farmers)
- Capital pathway (facilitated fundraising with proof)

The blueprint was ready. Now we needed the right builders.

THE FOUNDERS SPEAK

"Sahyadri's domain depth and network gave us instant distribution, live POCs and unforgiving feedback, so we could validate in weeks instead of seasons."

Azhaan
Co-Founder, Bharat Intelligence

"Access to growers and partners exposed us to real farm workflows, not hypothetical user stories, so we could build for actual constraints and compress our 0-1 learning curve."

Gaurav
Co-Founder, Bharat Intelligence

₹7 CRORE RAISED

Sahyadri Farms led. Ecosystem partners joined. Not because of a compelling pitch deck. Because the proof was undeniable.

The Platform

- Matches workers to farms via mobile app
- Provides worker verification and reliability scoring
- Offers embedded services (training, insurance, wages)
- Gives farmers predictability (book labor 2-3 days in advance)

1000s
Farm Jobs Matched

Platform operational

Funding Raised

September 2025

15K+
Farmer Network

Sahyadri ecosystem

The Vision Ahead

- Scale across Maharashtra horticulture
- Expand to other crops and geographies
- Layer skilling, financial services, tool-as-a-service
- Build the labor intelligence layer for Indian agriculture
