

WE DON'T JUST GIVE YOU IDEAS. WE GIVE YOU VALIDATED OPPORTUNITIES

How a farm labor crisis became a ₹7 crore venture in 100 days—
and what it means for the next builder.

[See How It Happened](#)

HOW WE FIND OPPORTUNITIES WORTH SOLVING

Before we ask you to build, we do the hard work:

DEEP FIELD RESEARCH

We interview 1,000+ stakeholders across the value chain—farmers, FPO operators, packhouse managers, transporters, wholesalers, retailers.

FRICTION MAPPING

We identify where value is lost: post-harvest losses, broken logistics, information asymmetry, financing gaps.

MARKET SIZING

We quantify the total addressable market, validate willingness to pay, and estimate unit economics.

SOLUTION VALIDATION

We test assumptions with pilot customers and secure early LOIs (Letters of Intent) before you even start building.

EXAMPLE: FIRST-MILE TO LAST-MILE LOGISTICS

₹92,000 Cr Lost Annually. 18–22% Post-Harvest Losses. Zero Reliable Solutions.

What's Broken

18–22% of fruits & vegetables spoil before reaching consumers

₹92,000 cores annual economic loss

41% of trucks run empty on return journeys (wasted fuel, wasted capacity)

No SLA-driven, temperature-aware logistics for smallholder produce

Quality disputes eat 15% of export opportunities

Who Suffers

Farmers lose 20–30% of potential income to wastage

Buyers pay premium for unpredictable quality

Transporters waste fuel on empty returns

Consumers pay inflated prices due to supply chain inefficiency

HOW BIG IS THIS REALLY?

TOTAL ADDRESSABLE MARKET

₹2.1 Lakh Crore

India's fruit & vegetable logistics + cold chain infrastructure market

IMMEDIATE OPPORTUNITY

₹40–50K Crore

Preventable first–24-hour losses that better logistics can capture

GOVERNMENT PUSH

₹4,570 Crore

Agricultural Infrastructure Fund disbursed for storage/logistics projects (2020–26)

Current State 90% of produce moves in non-refrigerated vehicles

The Gap Ambient reliability is under-served; most startups chase expensive cold-chain capex

What's Changing Organized retail (Big Basket, Reliance Fresh) demand predictable delivery windows

WHAT WE'RE LOOKING FOR: BUILDERS WHO CAN SOLVE THIS

Build an asset-light, SLA-driven logistics network that:

Reduces Shrinkage

Proper handling SOPs + predictable delivery windows = 40% reduction in quality losses

Solves Empty Returns

Backhaul engine pairing corridors (e.g., produce Nashik–Mumbai, packaging Mumbai–Nashik) = 30–50% reduction in empty kilometers

Improves Reliability

Control tower + GPS tracking + proof-of-delivery = on-time delivery >85%

Creates Embedded Revenue

Subscription model + fuel/toll payments + cargo insurance + invoice factoring

Why This Works:

- Start with 1–2 high-value corridors (Nashik–Mumbai, Punjab–Delhi)
- Partner with existing fleets (asset-light, not asset-heavy)
- Layer SLA premium + recurring revenue (not just freight brokerage)
- Anchor demand from organized retail, exporters, food services

WE DON'T ASK YOU TO BUILD IN A VACUUM

IF YOU BUILD THE RIGHT SOLUTION, WE GUARANTEE:

10,000+ TRUCKS

Worth of Pilot Volume

15,000 Farmer Members

200,000+ Tons Annually

Daily Dispatch Windows

Pilot Corridors Ready

- Multi city and multi state corridor ready

Success Metrics We'll Track

- On-time delivery %>85%
- Shrinkage reduction %30–40%
- Empty km reduction %30–50%
- Repeat customer rate>60%

BEYOND THE PROBLEM. BEYOND THE BLUEPRINT.

Validated market research

- Market sizing (₹2.1L cr TAM, ₹40–50K cr serviceable)
- Competitive landscape analysis
- Unit economics framework
- Risk mitigation strategies

Network Access

- Anchor customers (retailers, exporters, processors)
- Fleet partners (regional transport associations)
- Insurance/finance partners for embedded revenue

Pilot Infrastructure

- Anchor customers (retailers, exporters, processors)
- Fleet partners (regional transport associations)
- Insurance/finance partners for embedded revenue

Mentorship from Operators

- Market sizing (₹2.1L cr TAM, ₹40–50K cr serviceable)
- Competitive landscape analysis
- Unit economics framework
- Risk mitigation strategies

Capital Access

- Potential ₹20–50L direct investment if pilot succeeds
- Warm intros to Bharat Innovation Fund, Ankur Capital, Social Alpha
- Guidance on blended finance (AIF + equity)

READY TO SOLVE THIS?

You might be:

An engineer who's built logistics tech or marketplace platforms

A supply chain operator who's lived this problem daily

A second-time founder pivoting into agriculture

A domain expert (food science, cold chain, transport optimization)

What you need:

Ability to commit 4 months full-time (April–August 2026)

Willingness to get your hands dirty (literally—farm visits, pack house ops)

Bias toward building and testing, not theorizing

Team orientation (you'll find co-founders during the program)

Mar 10
Applications Close

Mid-March
Selection

April
Boot camp
Starts

May–June
Pilot Launch

August
Demo Day

LOGISTICS IS 1 OF 7 VALIDATED OPPORTUNITIES

Each opportunity comes with the same depth: research, market sizing, solution blueprint, and guaranteed access to pilot customers.

Logistics & First-Mile Supply

₹2.1L cr | 18–22% losses | 10K trucks PoC ready

Agricultural Credit and Finance

₹31.5L cr | 51% farmers digitally invisible | KCC renewal PoC ready

Crop and Climate Insurance

₹1.83L cr claims | 97-day avg settlement | Weather station network PoC ready

Waste to Wealth

₹24–49K cr budget | 4% adoption of resilient varieties | Farm trials PoC ready

Affordable Mechanization

₹1.45L cr market | 68% use manual tools | Equipment sharing PoC ready

Responsible Agritourism

₹22,100 cr by 2030 | 70% investor-owned | Farm stay network PoC ready

Value Chain Integration

₹40–50K cr | 86% FPOs only aggregate | Processing facility PoC ready

[APPLY](#)

Applications for the 2026 cohort are now open.

Built on farms, not slides.
